Rewan Shehab

A detail-oriented Data Analyst with a strong foundation in Computer Science. Experienced in handling structured data and executing complex projects with high accuracy. Proven ability to interpret technical guidelines (SOPs) and deliver quality results under pressure, leveraging analytical thinking developed through ICPC and rigorous technical training

Hello

I'm Rewan Shehab ,

About Me,

My technical journey began with a strong foundation in programming fundamentals , which honed my logical thinking and problem-solving skills.
Currently, I specialize in Data Analysis, utilizing a powerful tech stack to handle structured data projects. My distinct value lies in my ability to diagnose hidden operational gaps and translate data into actionable insights and recommendations.
Active in tech competitions and volunteering, I am eager to leverage my skills in internships and real-world projects to drive data-driven decision-making.

Education

Port Said University Faculty of Management Technology and Information Systems ITM Department.

2023 - 2027

Technical skills

- Technical Accuracy: Proficient in Python, SQL, and data structures, ensuring a deep understanding of how data labeling impacts AI models.
- Model Evaluation & Testing
- Attention to Detail: Demonstrated through high-stakes technical projects and quality control roles.
- Linguistic & Analytical Skills: Fluent in English with strong data storytelling and communication abilities.
- Adherence to Guidelines: Experience following strict logical frameworks in programming and competitive coding (ICPC).
- Fact-checking & Information Validation
- Side-by-Side (SxS) Evaluation
- Command Line Basics
- Computer Science Fundamentals:
  C++ & OOP
  Data Structures & Algorithms

Personal Skills

- Problem Solving & Analytical Thinking
- Logical Reasoning Verification
- Structured Reasoning
- Objectivity & Bias Detection
- Critical Thinking
- Effective Communication
- Attention to Detail

Soft Skills

- Teamwork & Collaboration
- Leadership & Initiative
- Time Management & Organization
- Communication & Public Speaking
- Adaptability & Flexibility
- Work Under Pressure

Work *Experience*

Data Analysis Track National Telecommunication Institute (NTI)	(11-12)2025

Data Analysis Professional Training | NTI Completed an intensive program covering the full data lifecycle. Delivered 6+ projects using Python, SQL, and Power BI, with a core focus on data integrity and fact-checking. Specialized in diagnosing operational gaps and ensuring 100% accuracy in data labeling and structured reporting to drive informed business decisions.

CS50: Introduction to Computer Science Information Technology Institute (ITI)	(8-9)2025

"Developed a rigorous foundation in algorithmic thinking and complex problem-solving. Gained hands-on experience with Command-Line Interface (CLI), memory management, and structured data. This training sharpened my ability to perform logical reasoning verification and technical audits, essential for evaluating high-stakes AI model outputs

Student Activities Activities

Organizer & Contestant | ICPC PSU Community	2023-2024

- Organizing the contests and coordinating activities among members.
- Participated in the ECPC competition as part of the “kyojin” team

Graphic Design & Marketing | NASA Space Apps	2024

- Won 4th place in Bootcamp. Designed visual identity and managed participant communications.

Volunteer | IOM Initiative	2025

- Conducted field visits in Beheira to raise awareness about illegal migration.

Vice Coordinator | Students for Egypt	2024-2025

- Leading student activities and coordinating HR & organizing committees.
- Managed logistics for new student reception and large-scale university events.

Quality Control & Organizer "For Our Children" Initiative	2023-2025

- Oversaw volunteering plans and bridged communication gaps between generations.

PR Specialist | "Hayah" Initiative	2024

- Managed outreach to university faculties regarding reproductive health awareness
